WSJT-X 2.1.0 ---> On 15 July Joe, K1JT and the WSJT Development Group announced the general availability (GA) release of WSJT-X Version 2.1.0. It is a major upgrade that introduces FT4, a new protocol for HF contesting. Improvements have also been made in other areas, as well as many minor enhancements and bug fixes. Upgrading from earlier versions of WSJT-X should be seamless. There is no need to uninstall a previous version or move any files. Links to installation packages for Windows, Linux, and Macintosh are available on <http://physics.princeton.edu/pulsar/k1jt/wsjtx.html>.
